## PROJECTS

### Audio Viber

#### VueJS NodeJS Express Spotify API

- A web app that helps Spotify users gain deeper insight into their favourite artists and tracks. Provides audio feature visualisations of a user's top artists and tracks.
- Includes a built in music player, allowing users to control their Spotify and view details of their currently listening track.

### Warehouse Listing App

#### VueJS NodeJS Express Axios

- A warehouse product listing app for a hypothetical clothing brand.
- Combines data from the brand's separate legacy APIs to display information in a consolidated product list, enabling fast and simple access to product details.

## EMPLOYMENT HISTORY

### Associate

#### RBB Economics (January 2017 - June 2019)

- Provided expert economic advice competition law issues and financial litigations.
- Managed data analytics and developed expert witness reports focused on the competition economics of our clients' markets.
- Presented findings to executives and external legal counsel.
- Worked internationally in Melbourne and London offices, and advised both European and Australian clients.
- Translated reports from Chinese to English, and vice versa.

### Sessional Teaching Associate

#### Monash University (2016)

- Facilitated the Principles of Microeconomics classes.
- Ran problem solving sessions, and guided students through case studies and theoretical problems.

## EDUCATION

### Monash University

#### Bachelor of Commerce (1st Class Honours), 2016

- Economics major
- Thesis: Modelling the interactive dynamics between international conflict and the arms trade. I developed a theoretical framework to assess how social welfare is affected by arms trade flows.
- GPA: 3.625

#### Bachelor of Commerce / Bachelor of Arts (Global), 2012 - 2015

- Economics / International Studies major
- GPA: 3.110

### Utrecht University

#### Global Exchange Program

- *Humanities and Finance*
